Profile

A dedicated high school graduate with a strong passion for programming, AI, and hardware analysis, I am eager to pursue a career in computer science. My long-term goal is to establish a global electronics company that uses AI to innovate and solve industry challenges. Despite academic disruptions due to the war in Gaza, my passion for technology remains unwavering. I seek to study in the UK to access world-class education, cutting-edge research, and the opportunity to refine my skills in an environment that fosters innovation. With a focus on AI and computer science, I am determined to contribute meaningfully to the field and achieve my entrepreneurial ambitions.

Education

- **October 2024 - Present**
  Muhammadiyah University, Indonesia
  Scholarship in Information Engineering
  Completed first semester with distinction, **GPA:** 95%
  Courses completed in the first semester: Mathematics, Physics, Chemistry, Biology, Arabic, English, Technology and Information, Islamic Teaching.
  Currently, I'm studying Information Engineering at Muhammadiyah University in Indonesia. I believe Manchester's outstanding education and focus on AI and computer science will provide the ideal environment for me to grow and work toward my career goals. I'm eager to be part of a community where I can learn, innovate, and develop the skills to make a meaningful impact in technology.
- **Sep 2023- Oct 2023**
  Islamic University of Gaza, Gaza
